Capstone certification description

The 3D Animation capstone confirms candidates' expertise in designing, developing, and refining digital animation projects. Building on foundational skills in 3D graphics software, these certifications assess abilities in planning, storyboarding, production, and testing within client-based projects. Candidates demonstrate proficiency in creating and animating 3D models, solving real-world animation challenges, and applying technical and creative skills essential for success in the field. Together, the exams validate comprehensive preparation for careers in animation, digital arts, and interactive media.
