Capstone certification description

The Digital Audio capstone assesses candidates' skills in producing high-quality audio across different environments. Digital Audio 1 introduces the fundamentals of sound theory, digital audio workstations (DAWs), recording, editing, mixing, and mastering. Digital Audio 2 builds upon this foundation with advanced techniques such as sound synthesis, multi-track and live recording, and professional-level mixing and mastering. Together, these certifications provide the technical and creative expertise needed for success in professional audio production and sound design.
