Capstone certification description

The Floriculture capstone assesses candidates' ability to apply both foundational and advanced floral and business skills. The Floriculture certification covers floral design principles, crop growth, and the management of commercial floriculture operations. The Floriculture Advanced certification builds on this foundation with a focus on advanced design techniques, floral mechanics, business management, and event planning for occasions such as weddings, funerals, and banquets. Together, the certifications prepare candidates to demonstrate creativity, critical thinking, communication, and the ability to meet client needs through professional, aesthetically pleasing floral arrangements.
