| Capstone certification description |
| --- |
| The Graphic Print Design capstone assesses candidates' progression from foundational design and printing skills to advanced production expertise. Graphic Print Design 1 introduces concepts in design, layout, safety, printing processes, and relevant software, while also developing skills in digital imaging, print preparation, and prepress. Graphic Print Design 2 builds on this foundation by evaluating candidates' ability to create and produce visual graphics, complete print projects, and understand the broader publishing and printing industries. Graphic Print Design 3 advances to professional-level skills in digital print design, with emphasis on complex graphic design, refined layout techniques, and effective visual communication. Together, these certifications confirm readiness for technical and creative roles in the graphic arts and print production fields. |
