About this capstone certification
The Medical Anatomy and Physiology capstone certification is a comprehensive certification earned upon successful completion of the following required stackable certifications. This structure validates a candidate's skills across the core areas of the profession and demonstrates readiness for advanced roles.

Required certification exams Exams may be completed in any order.	Items
Medical Anatomy and Physiology	73
Medical Anatomy and Physiology, Advanced	100

Capstone certification description
The Medical Anatomy & Physiology capstone assesses candidates' understanding of body structures, functions, and medical concepts. The first exam covers intermediate anatomy, physiology, medical terminology, diseases, and ethics, providing a foundation for advanced studies in health science. The Advanced Medical Anatomy & Physiology exam builds on this by evaluating college-level knowledge of human anatomy and physiology, preparing candidates for further healthcare training, advanced coursework, or careers in medical and allied health fields. Together, the certifications confirm comprehensive readiness for academic progression and entry into health science professions.
