Available as a capstone certification

Natural Resource Science

About this capstone certification
The Natural Resource Science capstone certification is a comprehensive certification earned upon successful completion of the following required stackable certifications. This structure validates a candidate's skills across the core areas of the profession and demonstrates readiness for advanced roles.

Required certification exams Exams may be completed in any order.	Items
Natural Resource Science 1	49
Natural Resource Science 1A	29
Natural Resource Science 2	43

Capstone certification description
The Natural Resource Science capstone assesses candidates' understanding of natural systems and the conservation of renewable resources. Natural Resource Science 1 introduces ecology, range resources, waste management, and land use, with an emphasis on hands-on learning through field and laboratory experiences. Natural Resource Science 1A supplements this with additional foundational skills for success in environmental science. Natural Resource Science 2 builds on these concepts by exploring the biological, environmental, and economic importance of renewable resources, including forest and range products, again reinforced through applied field and lab work. Together, the certifications validate comprehensive readiness for careers in natural resource management, conservation, and environmental stewardship.
