Capstone certification description

The Video Production capstone assesses candidates' skills in all phases of video creation, from planning to final output. Video Production 1 introduces foundational competencies such as camera operation, audio systems, lighting, pre-production planning, studio and control room operations, visual effects, and copyright laws. Video Production 2 builds upon these skills with advanced training in production and postproduction, refining technical knowledge in areas such as editing, visual effects, and legal considerations. Together, the certifications validate comprehensive readiness for candidates to contribute to professional video production in diverse media industries.
